Macomb County Health Department seeks input for \$45,000 Building Healthy Communities Planning Grant

Recently, the Michigan Department of Community Health Building Healthy Communities program awarded the Macomb County Health Department (MCHD) a \$45,000 grant.

As a result, the MCHD is seeking all county residents to complete a short community needs assessment survey to help with planning efforts for the grant. The survey has six questions and takes less than five minutes to complete. Visit <http://bit.ly/1GLIDJi> to access the survey.

With this grant, the Healthy Kids Healthy Futures Coalition, led by the MCHD, will build the capacity of local community partners to address healthy food access and physical activity by assessing community assets, resources and needs. Furthermore, the grant will enable the MCHD to increase healthy eating and physical activity through evidence-based policy, systems and environmental change strategies.
